

Product Features

Grid Series - Architectural T-Grid Linear fixture completely transform the monotonous grid ceiling into a contemporary lighting application. Luminaire available in 2FT and 4FT section with a width of 9/16" and 15/16", suitable for slot or flat T-Grid application. Luminaire available with 3000K, 3500K or 4000K CCT, remote driver attached above T-Grid. Made from from aluminum extruded profile; standard milky lens for maximum visual comfort. >80CRI; >50000 hours; IC rated; cULus for damp location, DLC listed; CCEA listed.

Technical Specifications

INPUT VOLTAGE	AC120-277V
FREQUENCY	50/60hz
LUMEN	1300 / 2600
WATTAGE	10 / 20
LPW	117 ~ 130
COLOR TEMPERATURE	3500K, 4000K
COLOR RENDERING INDEX	>80
DISTRIBUTION	120°
IP RATING	Damp Location
LIFE SPAN	>50,000 Hours
DIMMING	0-10v Dimming

GD Luminaire Summary

Power: 2FT - 10W, 4FT 20W

Quality: >80 CRI, 3-step SDCM

CCT: 3000K / 3500K / 4000K

Input: 120~277V, 50/60Hz

Dimming: 0-10V Dimming, continuous dimming to 10%

Dimmer: Tested with Lutron Diva-DVTV, Leviton IP-710-DL

Power Factor: Greater than 0.9

Ambient Operating Temperature: 0C° to 40°C (32°F to 104°F)

Lifetime: 50,000 hours at 70% lumen maintenance

Listing: cULus, DLC, CCEA, IC Rated

GRID SERIES | ARCHITECTURAL T-GRID LINEAR

INSTALLATION

The "□" shape installation steps:

- Examples of configurations
- Possible positions for T-grid LED light modules
- One-piece main runner cannot be replaced

Remove cross tee from the drop ceiling according to desired shape

DO NOT replace Main Tee

Adjacent T-grid must be secured via ceiling suspension

Install sequence: A - B - A - B (as shown)

Minimum Grid Layout: 4FT x 4FT

A-Point with Lead Wire
B-Point is slight shorter than the luminaire bracket

Properly adjust luminaire fitting, then tighten lock screws (both ends)

INSTALLATION

The " + "shape installation steps:

- Examples of configurations
- Possible positions for T-grid LED light modules
- One-piece main runner cannot be replaced

Remove cross tee from the drop ceiling according to desired shape

DO NOT replace Main Tee

Adjacent T-grid must be secured via ceiling suspension

Install sequence: A - B - A - B (as shown)

A-Point with Lead Wire

B-Point is slight shorter than the luminaire bracket

Properly adjust luminaire fitting, then tighten lock screws (both ends)

GRID SERIES | ARCHITECTURAL T-GRID LINEAR

INSTALLATION

Loosen T-Grid clip locknuts (both ends)

Install luminaire to grid and tighten the locknuts (both ends)

Secure driver enclosure onto T-Grid by tighten locknuts (both ends)

Connect luminaire lead wire by push into RJ45 jack (Max. 3 per driver)

Place ceiling tile to finish installation
