

Product Features

Lumina architectural linear louver fixture delivers premium performance, customizable looks, and effortless control, with standard and Hex louver lens options to support both aesthetic and visual comfort requirements. Housing from a 2.5" wide aluminum extruded profile, available in a 2, 4, 6 and 8-FT length with black and white finish options; integral driver, die-cast aluminum endcaps with magnetic interface; optional continuous rolling lens up to 40FT; field selectable distribution options; >80CRI standard, optional >90CRI LED; field selectable CCT in 2700K / 3000K / 3500K / 4000K / 5000K; LED lifespan greater than 100,000 hours; cULus damp location listed; universal input 120-277V dimming power supply for 0-10V dimming protocol.

Technical Specifications

INPUT VOLTAGE	Universal Input 120-277 VAC
FREQUENCY	50/60hz
COLOR TEMPERATURE	Field Selectable 2700K / 3000K / 3500K / 4000K / 5000K
COLOR RENDERING INDEX	>80, >90
DISTRIBUTION	Direct/Indirect, Field Selectable Output
IP RATING	Damp Location
LIFE SPAN	>100,000 Hours
DIMMING	0-10V Dimming, 0-100% Dimming Range

SENSOR-KIT-IFS06R

FEATURE

- **Installation:** Factory Install - Sensor Integral to Fixture
- **Commissioning:** through Remote Control
- **Control:** Adjustable Hold Time, Bi-Level Dimming, Manual/Auto - On/Off
- **Sensor:** Motion (Occupancy/Vacancy/Manual) and Daylight Harvesting

SPECIFICATIONS

SENSOR TYPE:	Passive Infrared Sensor (PIR)	COMMISSIONING RANGE:	50FT from Remote Control
INPUT VOLTAGE:	10-14VDC, >50mA	TIME SETTING:	10sec ~ 60min (adjustable)
LIGHT-CONTROL:	Daylight Harvesting with Automatic Dimming	DETECTION ANGLE:	360°
CONTROL OUTPUT:	0-10V, Max. 25mA sinking current	MOUNTING HEIGHT:	12FT Max.
OPERATING TEMP:	-4°F ~ +140°F (-20°C ~ +60°C)	WARRANTY:	5 years
		IP RATING:	IP20

1

Prepare all the installation accessories.

2

Remove the top cover of the fixture, pass the M22 bolts through the two holes in the back plate of the fixture, tighten them with M22 nuts, then reinstall the cover.

3

Fix the fixture and the frame together with the recessed fixing bracket.

4

Remove the diffusion cover with the suction cup. Pass the rotating bracket through the holes in the center of the M22 bolts, then secure the rotating bracket nuts with PM4x22 screws—do not fully tighten them.

5

Connect the AC cable of the luminaire to the mains power.

6

Push the fixture into the slotted ceiling and tighten the fixture to the ceiling with the PM4x22 screws to complete installation.

LUMINA SERIES | LOUVER

INSTALLATION

Indirect Lighting Module Installation

1. Knock out the knockoutholes and remove the wire covers.
2. Peel off the adhesive backing paper of the top-emitting module, then attach the module to the luminaire body and secure it with two screws.
3. Connect the wires. (For 2ft and 4ft luminaires: Plug in the terminal wires of UP LED1. For 8ft luminaires: Plug in the terminal wires of both UP LED1 and UP LED2.)
4. Tuck the wires into the luminaire and reinstall the wire covers.

Note: For 8ft luminaires, ensure wires are connected at both ends to the luminaire terminals

Joiner Installation

1. Remove the wire cover of the fixture with a screwdriver and take out the joiner bracket and connector pins from the accessory pack.
2. Insert the joiner bracket into the fixtures and insert the four connector pins into the holes of the fixture as shown in the diagram.
3. After connecting the docking terminal, lift the lever from the joiner bracket, bring the loop over to the installed hook, press down on the lever to lock the loop in place, and then reinstall the wire cover.
4. Tear off the adhesive backing of the light-shielding paper and stick it on the inner side of the luminaire body according to the illustration.

Connect the terminals as above if with joiners.

Diffuser Accessories (Optional)

Optional continuous rolling lens up to 40FT is available.

Note: Silicone seal is used to seal seams that may appear at both ends of the luminaires with multiple connections.
