1

Machine the holes on the luminaire body in accordance with their dimensions and the details specified in the drawing.

2

Method A: Drill holes, insert the expansion sleeves, feed the wires through the central hole of the wall-mounting bracket, and secure the bracket with KA4x30 screws.
Method B: Feed the wires through the central hole of the wall-mounting bracket and secure the bracket with 6#-32x5/16 screws.

3

Remove the endcaps from both ends of the luminaire, as well as the top cover.

4

Secure the fixture bracket to the mounting holes on the luminaire body with PWM4x14 screw assemblies. Insert the plastic grommet into the wire-passing hole.

5

Cut the wires inside the luminaire body, then feed them through the plastic grommet.

6

Reinstall the endcaps and top cover.

7
