ARCHITECTURAL

LUMINA SERIES

Client:  
Project:  
Type:  
Quantity:

#### Product Features

Lumina architectural linear fixture delivers premium performance and effortless control, featuring a diffuser lens that provides uniform, glare-free illumination. Housing from a 2.5" wide aluminum extruded profile, available in a 2, 4, 6 and 8-FT length with black and white finish options; integral driver, die-cast aluminum endcaps with magnetic interface; optional continuous rolling lens up to 40FT; field selectable distribution options; >80CRI standard, optional >90CRI LED; field selectable CCT in 2700K / 3000K / 3500K / 4000K / 5000K; LED lifespan greater than 100,000 hours; cULus damp location listed; universal input 120-277V dimming power supply for 0-10V dimming protocol.

#### Technical Specifications

|                       |  |
|-----------------------|--|
| INPUT VOLTAGE         | Universal Input 120-277 VAC                            |
| FREQUENCY             | 50/60hz  |
| COLOR TEMPERATURE     | Field Selectable 2700K / 3000K / 3500K / 4000K / 5000K |
| COLOR RENDERING INDEX | >80, >90   |
| DISTRIBUTION          | Direct/Indirect, Field Selectable Output               |
| IP RATING             | Damp Location  |
| LIFE SPAN             | >100,000 Hours   |
| DIMMING               | 0-10V Dimming, 0-100% Dimming Range                    |

## LUMINA SERIES

### INSTALLATION

#### Indirect Lighting Module Installation

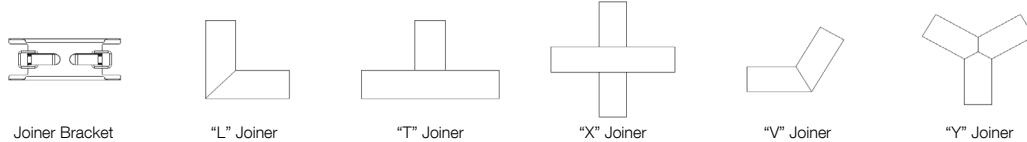

1. Knock out the knockoutholes and remove the wire covers.
2. Peel off the adhesive backing paper of the top-emitting module, then attach the module to the luminaire body and secure it with two screws.
3. Connect the wires. (For 2ft and 4ft luminaires: Plug in the terminal wires of UP LED1. For 8ft luminaires: Plug in the terminal wires of both UP LED1 and UP LED2.)
4. Tuck the wires into the luminaire and reinstall the wire covers.

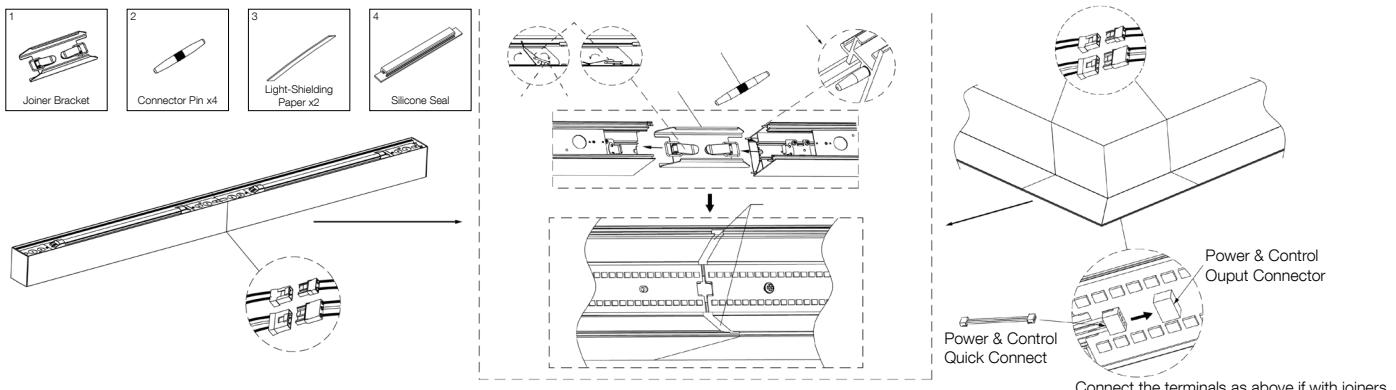

Note: For 8ft luminaires, ensure wires are connected at both ends to the luminaire terminals

#### Joiner Installation

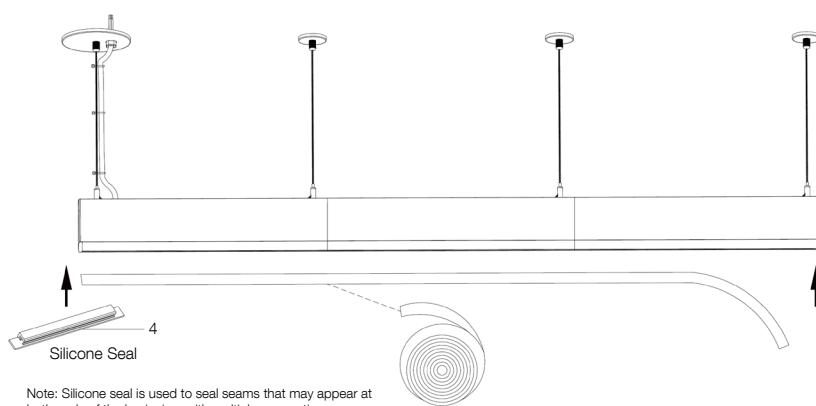

1. Remove the wire cover of the fixture with a screwdriver and take out the joiner bracket and connector pins from the accessory pack.
2. Insert the joiner bracket into the fixtures and insert the four connector pins into the holes of the fixture as shown in the diagram.
3. After connecting the docking terminal, lift the lever from the joiner bracket, bring the loop over to the installed hook, press down on the lever to lock the loop in place, and then reinstall the wire cover.
4. Tear off the adhesive backing of the light-shielding paper and stick it on the inner side of the luminaire body according to the illustration.

#### Diffuser Accessories (Optional)

Optional continuous rolling lens up to 40FT is available.

Note: Silicone seal is used to seal seams that may appear at both ends of the luminaires with multiple connections.
